Newsletter #4

June 2011

Gaumont Pathé Archives partners with Footage.net

More than 80,000 clips selected from the famous Eclair Journal, Pathé Journal and Gaumont Actualités are now available at Footage.net, the #1 search and screening platform. Those collections gather thousands of news stories aired in the theaters from 1906 until the late 70s. "We have decided to join Footage.net to reach new markets abroad. As our material is now digitized and fully available for screening online, we are eager to show it to researchers and producers worldwide" quoted Manuela Padoan, general manager of Gaumont Pathé Archives.

Gaumont Pathé Archives to remaster its 35 mm film collections into High Definition

Gaumont Pathé Archives is gearing up for the major project to digitize its collections in HD. "We have just completed our roundtable to choose the best solutions which will enable us to carry out the remastering of our 35 mm film collections", explained Manuela Padoan. "We have preferred 2K resolution because we want a sustainable medium of excellent quality and referenced by TV channels internationally. It is slightly oversized for today's television standards but it will not be obsolete in a few months". (more info in the next issue)

Sunny Side of the Doc, La Rochelle (France)

June 21-24 : ready, steady, go, ...!

You are working out a documentary project for which some archive material will be needed. Have a stop at our stand C29 to talk about it ... Discover our most recent collections or projects ... Ask for a free research online and screen the result of your query on the spot ... Seek the best advices from our team to get the right footage from our collections ... Some slots are still available for a meeting with both you and your project in La Rochelle.

Available online at www.gaumontpathearchives.com, our English/French database offers screening facilities. Just ask for a free access code and enjoy thousands of digitized clips.
