Game fishing collection lands at NHNZ Moving Images

NHNZ's stock footage archive Moving Images has secured exclusive rights to sell Tightlines' action-packed game fishing footage from Matt Watson's *Fishing Show*.

The collection of over 1500 clips features a wide diversity of the Southern Ocean's target species - on the hook and in the water - including Kingfish, Marlin, Tuna, Hapuka (Groper) and Snapper.

NHNZ Moving Images director Caroline Cook says the collection is a boon for the archive.

"This collection has something for everyone working on underwater concepts: big game fishing action, great behaviours and human animal interactions, the list goes on and on. There are multi-shot options with pole cam and tow rig shots available."

Like all our footage, NHNZ Moving Images' across-the-board rate of US\$40 per second, all media (excluding theatrical), no minimums applies to the Tightlines collection, including free research, low tech fees, and no kill fees.

NHNZ Moving Images

NHNZ Moving Images is a specialist stock footage archive delivering premium factual content to editorial and creative producers worldwide. Our research team has an in-depth knowledge of Moving Images' extensive archive. We specialise in natural history; adventure and travel; science and technology; history and culture footage from around the world. www.nhnzmovingimages.com
